OBJECTIVES

A motivated BCA student with a strong foundation in programming, databases, and web technologies, seeking an entry-level position or internship to apply technical skills, gain practical experience, and contribute to real-world software projects.

PROJECTS

Library Management System: | [GitHub](#)

- Designed and developed a web-based library management system.
- Implemented book management, user handling, and borrowing features.
- Built backend logic with PHP and MySQL using CRUD operations.
- **Technologies Used:** HTML, CSS, JavaScript, PHP, MySQL

Simple Chatbot (Learning Project) | [Live Demo](#) | [GitHub](#)

- Built a functional chatbot interface while learning React, applying core concepts hands-on.
- Used React Hooks (useState, useEffect) to manage chat state and component lifecycle.
- **Technologies Used:** React.js, React Hooks, JavaScript, HTML, CSS

EDUCATION

Level	College/school	Board	GPA
S.E.E	Oxford Secondary School	NEB	3.80
+2	National College of Computer Science	NEB	3.18
Bachelor	Prime College	TU	Running

TECHNICAL SKILLS

- **Programming Languages:** C, JavaScript, PHP, Java
- **Web Technologies:** HTML, CSS, React.js
- **Database:** MySQL

SOFT SKILLS

- Problem-solving and logical thinking
- Willingness to learn new technologies
- Team collaboration
- Time management

HANDS-ON PRACTICE & CODING CHALLENGES

- Frontend Mentor:
 - Built responsive user interfaces based on real-world design briefs.
 - Improved skills in layout design, responsiveness, and clean CSS practices.
- iCodeThis:
 - Solved daily frontend challenges focused on UI components and layout implementation.
